

2017 Massey Grand Rounds Symposium – March 22

Over the day we will examine how key aspects of our physical environment, namely air quality, nutrition and drugs, impact our health as individuals and as a society. Health problems to be addressed include: asthma, obesity, diabetes, addictions, violence and homelessness. We will do so with a diverse selection of expert speakers addressing multiple pillars of current research, including biomedical, clinical and public health. The day will also culminate in an illuminating and interactive panel discussion on **“Health in the Urban Environment”**. Some of our distinguished speakers and specific topics will include:

Dr. Susan Tarlo, “Health effects of the air we breathe – at home, work and outdoors”

Dr. Thomas Wolever, “Carbohydrate Quality, Quantity and Health: Added Sugars”

Dr. Jürgen Rehm, “Illicit drug use in Canada, harms and public health”

Dr. Peter D. Donnelly, “Violence: a further urban environmental health challenge”

Dr. Stephen Hwang, “Housing: A critical determinant of urban health”

Dr. Gillian Booth, “The built environment, obesity, and diabetes”

Massey Grand Rounds (MGR):

Massey Grand Rounds is comprised of members of the Massey College community, including physicians, medical students, and graduate students in areas related to medicine and health sciences. It convenes monthly during the school term and serves as a discussion forum for topics related to medicine, the health sciences, and issues of interest to students. The group is guided by mentor Dr. Aubie Angel, C.M., MD, MSc, FRCPC, FCAHS. This Symposium is a project of MGR for the benefit of the entire U of T academic community and for all medical and health science students.

Junior Fellow Organizers of the 2017 Symposium Include:

- Alex Koven (Co-Chair)
- Peter Jianrui Liu (Co-Chair)
- Katie Dunlop
- Alaina Jamal
- Michael Lebenbaum
- Arsalan Mir-Moghtadaei
- Daniel Szulc
- Gurveer Bains
- Kirill Zaslavsky

Administration:

- Cristina S. Castellvi
